AutoCAD Map 3D is a component for AutoCAD allowing the user to modify existing 3D CAD objects (controllers, breaklines, surfaces etc) in the Map input panel AutoCAD is the host for the Autodesk 2D PDF converter (formerly called PrintRunner) that allows the user to convert AutoCAD drawings to PDF. MFDs are often used as an alternative to a touchscreen as an easy-to-use control mechanism for applications with large menus or more complicated menus. MFDs may be standalone, as part of a host, or provided as a third-party component. Accelerators The Accelerators component provides basic functionality that accelerates the user interface interaction and various functions. For example, the accelerators can intercept keystrokes and provide context sensitive help. Some accelerators are provided by Autodesk as a component of the product, while others are stand-alone utilities. AutoCAD LT does not include an accelerator component, but third-party tools that are compatible with AutoCAD LT and the Autodesk platform are able to use the same "combo-keys" as AutoCAD. Unused accelerators are deleted when the user removes a menu command, but the command is not "uninstalled". In addition to the default command accelerators, users can build their own shortcuts using the AutoCAD keyboard accelerator command or by building custom macros. Pricing AutoCAD LT is currently available only in two editions: AutoCAD LT Standard which is free, and contains all of the features of the other editions of AutoCAD, plus a few additional editing tools. AutoCAD LT Architectural Designer contains all of the features of AutoCAD LT Standard, plus additional tools for the architectural and design process. AutoCAD LT Architectural Designer is available as part of a volume licensing program.
