Cardiac tamponade: an unusual presentation of takotsubo cardiomyopathy. Takotsubo cardiomyopathy is a non-ischaemic heart failure syndrome that mainly affects postmenopausal women and presents with chest pain and transient left ventricular dysfunction. In the presence of known coronary artery disease, coronary arterial spasm is the most frequently proposed mechanism of pathogenesis of Takotsubo cardiomyopathy. We describe a patient with acute left ventricular failure caused by Takotsubo cardiomyopathy in whom chest pain was the presenting symptom.
