Sun Times Description and Review Sun Times Description and Review Times Description and ReviewSun Times Description and Review 18 Mar 2017 05:22:04 -0800androidapp of mediodorsal thalamic nucleus. Reserach progress and model of mediodorsal thalamic nucleus organization and function]. The brain of mammals is organized in a highly specific manner. The mammalian brain controls locomotor, cognitive, emotional and sensory functions. The thalamus provides a relay between the cortex and the brainstem, receiving the sensory information and directing it to specific cortical target. The mediodorsal thalamic nucleus (MD) receives the information from the cortex, cerebellum, hippocampus, colliculus, primary olfactory nucleus, locus coeruleus, amygdala, caudate nucleus, geniculate nucleus, ventral posterior lateral nucleus, reticular nucleus of the pons, superior colliculus and visual cortex. These connections ensure the integration of visceral, somatic and cognitive information from the brain into a global image. The corticothalamic system and the corticobulbar projections are organized in a modular manner which facilitates the transfer of information from one cortical region to another.

What's New in the Sun Times?
