Below link provide you latest edition of Mastercam X5 Crack. Download Q: docker registry certificate authentication error (using HTTPS) I'm running docker registry 2.1.1 on Windows. I have issues with using HTTPS and want to use the tls plugin as described in the documentation, but it keeps throwing an error. The relevant part of the YAML file (the node default-certificate key is commented out): image: registry:2 replicas: 1 imagePullSecrets: [] nodeSelector: {} tls: insecure: {} initialDelaySeconds: 10 tolerations: [] nodeName: 'docker' securityContext: {} volumes: # default-certificate has been commented out but still generates the error. I want to use that certificate because it's valid for a Windows CA # The certificate path must be absolute or relative to the insecure registry path # The container name (we are the registry) and secret name (initial_tls_secret) will be truncated from this certificate # - run # - registry # - tls # - default-certificate # - C:\certificate\intermediate.pem # - C:\certificate\fullchain.pem # 3da54e8ca3
