

April 11, 2014 - The Leethax Mozilla Firefox browser extension is definitely a browser extension that allows you to cheat on certain games in order to gain benefits.## It's not just a browser extension. This is a browser extension. Browser extension. I even think you can call it "browser extension". Because the browser extension that actually extends the browser will be the one that extends the Firefox browser, not Leethax. It is certainly not an extension that extends the browser. And not just an extension that extends the browser. It is also not an extension that plugs into the browser.
