What's New in the CH Professional Edition?

CH Professional is a tool to assist students, teachers, and coaches of all levels in learning and teaching any

programming
language. CH
supports students in
basic C/C++
programming, as
well as advanced
topics like object-
oriented
programming, logical

principles, advanced programming, etc.

CH Professional Edition Features *

Tasks with actual C/C++ code are displayed on screen.

* Complete source code for any task is

displayed on screen
so users can easily
modify the code and
re-execute. * A text-
based editor for all
programming tasks
is available to enable
users to write and
edit the code

directly. * A structure of the program is displayed for each task, allowing users to identify variables, loops, and switch logic. * Creating, editing, re-running

and compiling code is supported. *

Programming languages C/C++, Java, HTML, and many other are supported. *

The application has an advanced debugger

with breakpoints,
variable inspection,
watchpoints, and
stepping/pacing. *

Variable and method
information,
variable/method
scope, and
references to source

code are displayed. *

Integration with external source code can be made through a wide range of integration mechanisms including: hyperlinks, code

lines, parameter lists, dialogs, and more. * The application has a comprehensive reference section for each task containing a list of variables, methods, classes,

and arguments, as well as links to external website. *

Compilation, debugging, and linking support is available for Windows, Linux, and Mac OS X. * All

versions of GCC, Microsoft Visual C++, Java, and Fortran compilers are supported. * The application can be installed on a USB key to enable students and

coaches to quickly
install it and use it
on any computer. *

100% traceability:
Results of a task are
always integrated
into the source code
so users can verify
and keep the results

when re-running the task later on. *

Altering of variables in real-time allows coaches to optimize the game and maximize the results for their athletes. * It is also possible to

create, edit, compile, link, and run tasks from CH Professional Edition. * Import from and export to HTML or Excel is supported. * The application can be run from a script file.

* Script files can be created and edited directly using CH Professional Edition.

* Script files can be written using C/C++, Java, HTML, XHTML, VBScript, JavaScript,
