To talk to other users you can use the normal text chat, the Gaim and/or the X-Chat plugins, that allow you to keep chatting when your friend leaves the IRC channel. The application has three configuration modes: - Prefer English - in this mode the application will try to detect your language settings and select an available language for your web-browser. - English - in this mode the application will try to detect your language settings and select an English language for your web-browser. - ISO-2022-JP - this is an implementation of ISO-2022-JP encoded chat, useful for Japanese users. - UTF-8 - in this mode the application will automatically detect your web browser encoding setting, and accept it as UTF-8. Quircus is a lightweight, Java-based IRC client that you can use to keep in touch with your friends or chat with other connected users on IRC channels. 1.1 "The secret of coding IRC client is simple: don't use stupid tricks" and "Paste never kills!" When the applications developer wasn't careful when he used to develop the application, he found himself in a situation where both of the icons appeared within the dock, but didn't do their job. So, after the release of the application, he met an issue where the icons didn't work in the dock. 1.2 Quircus is currently developed by Ivan Uilitic. It is based on the latest source code from GNU Public License (GPL) and Apache License (Apache-2.0) licenses. The source code of the application is currently on GitHub. Quircus currently supports a full screen view of IRC server, but the application should support the multiple windows of IRC channels. What is an IRC server? An Internet Relay Chat (IRC) server is a client-server application for which the clients don't have to be run on the same host as the server. One can join the channel even after the server has been closed. There are many services that provide a server and an IRC client. Quircus currently supports IRC services hosted on FreeBSD/NetBSD or Linux systems. 2.3 The Quircus server is currently restricted by the 10,000 QUEUE_COUNT setting of the OpenFire server. 2.4 The QUEUE_
