The following actions are considered "Online Play". \* During this period, it will not be possible to change the party, use the statistics screen, or allocate attributes. \* All online actions take advantage of the new online play even if you enter the game. \* In addition to the standard

## Features Key:

**Pure Watering System** - This game has no battles and there are no enemies that appear on your quest. As such, we have implemented a watering system, allowing you to eat a certain amount of HP and Magic to survive the quest instead of opening chests and fighting every enemy.

**Realistic and Immersive World Map** - Along with the in-game map, we created a completely different world map for the intelligent rumor system to operate on.

**Online Play and Customization System** - With the customizable character system and various items, the online aspect will be an enjoyable element that you can enjoy even offline as well. A lot of our staff have played MMOs and would like to draw a break from the mosh pit, and so we are constantly looking for ways to explore the online play and do our best.

**Open Crafting System** - A unique crafting system that allows for the modification of equipment and the creation of equipment. You can raise the level of blacksmithing, armor crafting, crafter attributes, and cover levels to give you the best equipment.

**Secrets of Shinryu** - Secrets of Shinryu are story units that appear over certain places during the quests. Only certain GMs have access to them, so it has been concluded that our project features a lot of story-driven quests. The secrets that appear on the map require a LOT of wrangling to obtain, and the difficulty will vary from place to place, so please try your best.

## Key Features of Tarnished:

- **Customization System** - Tarnished has several custom-designed examples for the character customization system. Not only does your appearance reflect your character, but you can also customize elements such as the body proportion, face color, voice, and growth of hair.
- **Grand World Map** - Tarnished has a map that is wider and deeper compared to the existing Shinryu. You can travel to special places, fight monsters and plant flowers as you progress your way toward obtaining the key blade.

The quality of the image depends upon the capability of the video camera to detect a subset of light energy from the optical source. In the case of a visible light spectrum, this voltage or current ("image signal") is electro-acoustically converted to a humanly audible signal. Video cameras used in security applications require a very sensitive image sensor. A video camera's primary image sensor utilizes incident light energy, which is converted into an electrical signal by the sensitive element. This electrical signal is called an electrical image signal ("electrical
