What's New In Portable RogueKiller?

Portable RogueKiller is a portable application that enables you to safely scan your computer for malicious content, thereby helping you keep your PC free of such unwelcome programs. RogueKiller is designed as a full-featured anti-malware tool, offering a wide variety of features aimed at fast and

accurate detection of rootkits, worms, spyware, PUPs, keyloggers, and other dangerous software. RogueKiller features the highly-advanced RogueKiller engine, a very powerful and efficient scanning engine for detecting rootkits and other malicious content. RogueKiller also detects spys, keyloggers, and other malicious software. RogueKiller is the single most popular rootkit remover on the Internet today and consistently remains the top-ranked rootkit solution on VirusTotal. RogueKiller is a powerful anti-malware solution for identifying, removing, and preventing malware, rootkits, spyware, keyloggers, and other malicious content. RogueKiller may be installed and used completely without Internet access and without altering the computer system in any way. RogueKiller is available for download as a portable application and is designed to work on all versions of Windows XP, Windows Vista, Windows 7, and Windows 8. RogueKiller is the only solution available that is packed with a built-in rootkit scanner. The effectiveness of RogueKiller's built-in anti-rootkit scanning engine is unmatched on the market today. The engine combines three different technologies for rooting out rootkits: a bootkit detector; antivirus scanner; and anti-rootkit scanner. RogueKiller is also capable of detecting and removing PUPs – potentially unwanted software programs – and

modifying system settings, like the default web browser, using a fully automatic approach that is not intrusive. RogueKiller uses a robust dual detection engine with heuristics and signatures. More than 20 detection categories are available, including Windows processes, Scheduled Tasks, Service files, DNS entries, and DLLs. RogueKiller scans the key areas of the system, including the registry, browser settings, Startup, and ActiveX control objects. RogueKiller cleans each detected file with standard virus cleaners and, as a result, is able to clean, quarantine, and remove many malware threats, including very aggressive ones, such as Trojans, rogues, and worms. RogueKiller is able to clean all these threats including real-time threats, which are very dangerous for
