I want to show that O_K is a Dedekind domain. I saw this theorem in Wikipedia, If K is a number field and O_K is the ring of integers of K , then a) O_K is a Dedekind domain. b) O_K is a UFD. c) The ring of integers of a number field is a Dedekind domain. I am not sure about how to prove this theorem. Please help me prove this theorem, thanks in advance. A: Let L be the number field $\mathbb{Q}(\sqrt[4]{5})$. L is a real quadratic extension of \mathbb{Q} and O_L is a Dedekind domain. Therefore every \mathbb{Z} -submodule of O_L containing 1 has a \mathbb{Z} -generator. Now O_K contains O_L , therefore O_K contains 1 , hence O_K is a Dedekind domain. A: Let $A = \mathbb{Z} \cap O_K$ be the intersection of the ring of integers and the ring of integers. It's a \mathbb{Z} -module containing 1 and with non zero divisors. By Hilbert's theorem 90, the group A is free so it's free as a \mathbb{Z} -module and this implies that it's projective (by Nakayama's lemma) so that $\text{fd}_{\mathbb{Z}} A = \text{fd}_{\mathbb{Z}} \mathbb{Z} = 0$. Q: PHP SELECT certain rows from MySQL from second subquery I have a two separate MySQL tables, one

Mirai virus is a powerful ransomware virus. It encrypts all type of files and asks for a ransom of \$250, not so difficult to pay. McAfee researchers reported a new variant of the "Mirai" virus. With the deaths of two B.C. infants and a toddler in Darke County, some are calling for an investigation into whether the deaths were the result of an "overall lack of safety" in the community's health care system. Early

Sunday morning, 1-year-old Caladenia (Cali) Middelkotte was found dead of what are believed to be non-fatal head injuries in the 14700 block of West Marion Road in rural Darke County. According to a statement released by Darke County Coroner Sherry McNutt, emergency workers found Cali “unresponsive with multiple injuries, and eventually pronounced dead at the scene.” The coroner, who is still trying to determine how the toddler died, said the injuries were “inflicted,” but

that it's too early in the investigation to determine cause or manner of death. The full statement, obtained by CTV News, reads as follows: "On Sunday October 17, 2014 at 1:07 a.m. CDT, the Darke County Coroner's Office received a 911 call in reference to a one-year-old boy (fetus) whose body was found in the 14700 block of West Marion Road. Emergency Medical Services (EMS) and law enforcement responded to the scene. The child was in a lying position in a dry creek bed and

was pronounced deceased at the scene. “The Coroner’s Office has been notified and an autopsy is scheduled for this afternoon. Further medical information will be released at the conclusion of the autopsy. At this time there are no signs of abuse or neglect. The Coroner’s Office is in the process of determining how the child died at this time. Injuries are inflicted, but they are not considered life threatening. “

On Tuesday, 13-month-old Zephaniah Middelkotte was found dead in the same area.

The boy was a toddler who was a patient at St. Anne's Hospital in Marklesburg, more than 100 kilometres from Marion.

Zephaniah's mother was driving home to the United States when she was pulled over on 6d1f23a050
