I am trying to follow the tutorial on how to create a simple app on Android like this, but it requires 2.3 or higher. I am only running 2.2 and I cannot change my minimum SDK. At what stage is the app highlighted on the right and it says "Add new res directory"? A: The first image tells you that in the directory you're working on now you will have two new folders: res (res -> resources) values (values -> resource.values) When the app starts, the default values are all set to 0, so it is necessary to modify them in order to be able to debug the app. The second image is about android's structure. At this stage, you don't need to add a new folder for the resources. You only need to create a layout for the first activity (or to add a new layout for the whole application, the only difference is the size of the layout, smaller is more

important). The last image describes what you need to do, in case you're interested in the problem you're facing. It is not a valid xml for google docs and other apps. So you need to change it to android's way to describe layouts by adding the XML elements.) . L e t h b e (- 1 0) / (- 8) * 1 8 / q . S o l v e h * m 6d1f23a050
