Ask HN: How do you deal with an ISO audit? - vog When I was reading the LinkedIn profiles of certain companies, I realized that many of them follow standards like the ISO 9001:2008 (https://en.wikipedia.org/wiki/ISO_9001:2008).What are the requirements for an auditor in this case? Should the auditor be familiar with this standard, and if yes, then how do the implement this standard. Would it make sense to ask the authors of the standard what is a reasonable amount of tests to be used? ===== peng For a general answer, I would recommend looking at the NIST FAQ on ISO 9001 [1]. To answer your questions specifically, there are a variety of other questions which should be answered by the auditor. 1\ Are you familiar with the scope of the standard? 2\ Does the auditor meet the requirements of the standard? 3\ Is this a valid exercise of the standard?

The purpose of this study is to determine if MPA or CSA, when given alone or in combination, alters central nervous system (CNS) function. The effects on CNS function of MPA and CSA administered alone or in combination are determined by locomotor activity, sensorimotor activity, grip strength, and catalepsy induced by scopolamine in rats, and by behavior in the elevated plus maze and holeboard in mice. The results of behavioral experiments in these models are not only informative regarding MPA and CSA effects on CNS function, but they will also provide a sensitive tool for defining the CNS liabilities of MPA and CSA, using sensitive and quantitative measures of CNS function in the same animals.Fatal non-Hodgkin lymphoma presenting as a solitary left pneumothorax in a patient with intermittent pneumatic compression garments--a case report.
